

Quick Sheet: Creating a Pathology Requisition

Overview: This Quick Sheet describes the steps necessary to create a pathology label. Remember that pathology labels may only be printed by a workstation that has the appropriate label printer and installed label software. Refer to doc2MD's web site for specific hardware recommendations or requirements.

Pathology labels are printed as a result of the medical provider adding a pathology procedure document element within a encounter's diagnosis.

Step 1: Open an encounter. Encounters may be accessed from the active encounter list within doc2MD. To display this list, select the Active Encounters button on the main tool bar.

Once clicked, you will be presented with the active encounter list. Double clicking on the encounter will open the appropriate encounter editor.

Step 2: Choose Diagnosis from the icons within the Edit Encounter Navigation Bar.

Step 3: Select the appropriate diagnosis from the list provided.

Currently documenting [Diagnosis - BCC] Append Note					
Modifiers					
Exam	Location	Differential	Size	Path Procedure	Medication
Procedures	Lab Work	Number	Comment		
Descriptors: Select Path Procedure					
Excision	None	PunBx2.5	PunBx3.0	PunBx3.5	PunBx4.0
PunBx5.0	ShavBx	ShavRem			

Step 4: Select the appropriate Location, Exam, and Differential.

- Diagnosis-(Right arm)-Basal Cell Carcinoma
 - Differential-Rule out Basal Cell Carcinoma
 - Location-Right arm
 - Exam-Pearly plaque with telangiectasias
 - Size-0.1 cm
 - Path Procedure-PunBx2.5

Step 5: Select Pathology Procedure – if all required information is entered (Location, Exam, Differential) then doc2MD will automatically print the appropriate label at the work station that has been defined as the one to print pathology labels.

Step 6: Select Pathology Requisition from the Navigation Group.

You will be asked to send the pathology specimen to the default lab on file or to select a lab from the list of pathology laboratories on file.

Print Pathology Requisition X

Pathology entries were made to the log however no lab was selected.
Would you like to print the Pathology Requisition with the default Pathology Lab?

Selecting Yes, will automatically print the requisition to the default lab.

Selecting No, will allow you to select the lab of your choice from the ones provided.

Lab Search

Double click the lab, or select the lab and press Select button.

Abbreviated Name	Lab Name	LabType
▶ PathLab	Pathology Lab	Pathology

Select the lab desired to complete the report.

Note: To manage the pathology labs, select Laboratory from the Navigation Bar and then select the Manage Laboratory List icon.
